

# OUR PLANS AND PRIORITIES 2016/17

The WMAHSN catalyses co-operation, collaboration and productivity between academia, business, commissioners and providers and generates continuous improvement in the region's health and wealth through the adoption of proven, beneficial innovation.

## What we plan to achieve

### For our population

- Improve access, experience and outcomes
- Reduce variance
- Make a difference

### For our members

- Digital and data enablement
- Support the delivery of person-centred services
- Provide proven innovative solutions and technologies to drive efficiency and improve outcomes

### For the Office of Life Sciences and Accelerated Access Review

- Support engagement with NHS to reduce time to evidence and to market for med tech, diagnostics, digital and pharma industries

### For NHS England and NHS Improvement

- Deliver on innovation and improvement components of Five Year Forward View, Francis Review and Carter Review

## Our priorities

Wellness and prevention of illness

Mental health: recovery, crisis and prevention

Long term conditions: a whole system, person-centred approach

Advanced diagnostics, genomics and precision medicine

## How we are going to deliver

### Develop our service offer

- Develop Meridian as the single innovation membership service for West Midlands' NHS, academia and industry
- Create a Meridian citizen engagement capacity

### Support new models of care

- Sustainability and Transformation Plans
- Devolved authorities
- Federations
- Acute provider groups
- Accountable care organisations
- Local digital roadmaps
- Social economy providers and investors

### Support Living Labs and testbeds

- Develop the next generation of regional, national, European and global innovative collaboratives
